MCH / HERNING

PRESENTS

THE WAVE

SOUND
ACOUSTICS
TECHNOLOGY
INNOVATION

Catch The Wave on May 9-11!

There's a new wave in sound, acoustics, technology and innovation going out from Denmark, the World's strongest hot spot for Sound Tech!

Visit the World's freshest sound tech conference and expo on May 9-11: **The Wave @EOT**, made in partnership with **Sound Hub Denmark** and **Danish Sound Cluster**, showcasing the deep competences, talent, diversity and fantastic opportunities on the Danish Sound Tech stage.

Meet brilliant products, ideas and startups and enablers with the potential to make it happen. Join in with researchers, scientists, thinkers and tinkerers, doers, networking bonanza, business and knowledge in one spot.

Maybe the startup, thinking and potential next big thing is yours. Maybe the need to scale beautifully is yours. Maybe the vc and possibilities are yours. Maybe the know-how is yours. In either case, let's meet at **The Wave on May 9-11** during Scandinavia's biggest tech expo **EOT / ELECTRONICS OF TOMORROW** in MCH, Herning - and practice some serious sound thinking.

Learn more about the Wave, watch the programme, meet exhibitors and startups and **register today** for The Wave and EOT on eot.dk/thewave/
